What is BEN?
- In 1999, AAAS along with 11 other professional organizations established the BiosciEdNet (BEN) Collaborative with funding from NSF as an NSDL Pathway
- The BEN Collaborative consists of 24 partners working together to provide an array of peer reviewed materials to the scientific community
- BEN partners include: AAAS, ABLE, AIBS, APS, ASBMB, ASCB, ASHG, ASM, BCC, BI, Bio-Link, BSA, DNALC, ESA, FUN, HAPS, MBL/MSU, NHM-AE, SDB, SICB, SOT, STKE, VIDA

Why IsoveraDL?
- The IsoveraDL initiative has been taken to resolve the lack of synergy, high maintenance costs, high start-up costs, and poor peer reviewer systems
- The goal is to provide digital library software that is easy to install yet robust enough to handle complex tasks in a cost effective solution

IsoveraDL
- Digital library setup can be performed by managers, not developers
- Default customization for BEN-LOM
- Customize metadata structure, controlled vocabularies, user profiles
- Supports dynamically building record submission forms
- Support for multiple sub-collections on a single implementation, e.g. APS will incorporate HAPS, SDB, NAHSEP, Physiology for the 21st Century
- Modular design including components for: Peer Review, Harvester Exporter, Search and Browse

IsoveraDL for the Digital Library Community
- Contributing partners are able to set up digital libraries without editing code
- Open source technology standards used are familiar to the digital library community
- Allows efficient integration of records to the BEN portal
- Increases the collection of total records available to the community

IsoveraDL at a Glance
- Highly customizable
- Create your own forms, workflows, reviewer groups
- Edit workflows without having to worry about existing records in the workflow
- Use IsoveraDL controlled vocabulary to dynamically create form options
- Assign/Reassign reviews to users of multiple groups
- Set timeline for review completion
- Redirect reviews to earlier stages in the workflow
- Supports simultaneous use of multiple workflows
- Get complete history of ongoing and completed reviews
- Get user statistics and workload information to better manage task distribution

IsoveraDL Future
- May 2008
  - IsoveraDL 2.1 released
  - Peer Review System
  - Advanced Search and Browse
  - Metadata Harvester
  - Implementation for: ASHG
- October 2009
  - IsoveraDL 3.0 released
  - SaaS hosting released
  - Performance Speed Increase
  - Implementation for: APS
- September 2006
  - IsoveraDL 1.0 released
  - Input Process Management
  - Metadata Record Management
  - Metadata Record Validation
  - Implementation for: VIDA, ESA, BioQUEST

The Story So Far...
